

GERGAMA

Production of beds and mattresses

Speed is important but we measure efficiency by quality.

ABOUT US

GERGAMA is a wholesale producer of beds and mattresses for comfortable sleep in style.

We are a family business, working together for more than 25 years and bringing together a team of 150 specialists. Gergama belongs to the LONAS group. The group's companies specialise in the sleep products industry, from supply of raw materials and production of components to logistics and sales.

Our experience and well-tuned processes allow us to significantly increase our production volume and constantly develop our competent and loyal employees. Today we can perform even the largest and most complicated of your orders.

A WORD FROM THE DESIGNER

Fundamental geometric motifs, such as the point, the circle, the line, the square and the plane, are of use because they can be flexibly integrated together with other elements of the future interior space.

The bed differs from other furniture in that the buyer decides what kind of textile to use to upholster it. For this reason, when designing beds, I chose a minimalist, laconic form of expression. I sought to create models which harmonise with interior spaces of the most varied styles and with the chosen textile.

As a product designer, my challenge and primary task is to create products that are sufficiently universal, but at the same time do not limit the buyer's individuality, and give the buyer an opportunity to create an exceptional bed from different elements. Some of the ideas which have become part of the collection include an interpretation of the classic headboard divided into squares, modular segments giving the buyer the opportunity to create an infinite number of compositional variations, and accessories allowing the buyer to supplement the bed with convenient components.

Although when creating the bed models I do not know the people who will buy the products I design, I always seek to anticipate their expectations and to find solutions to the needs of the contemporary person. I believe that the beds of the GERGAMA collection will easily find a place in interior spaces and will help create a stylish and comfortable oasis.

Designer Rasa Balaišė / RASA deSIGN

OUR PRODUCTION

BEDS

You can choose a bed from our collection or give us your idea, and we will make it happen. Our technological solutions help us adapt the production process for mass production as well as individual needs.

MATTRESSES

Our production of mattresses can meet even the most exceptional demands in terms of size, colour, design and packaging. We can help choose the necessary components and use certified materials to produce a mattress meeting the highest standards and individual needs.

OTHER PRODUCTION

During the past twenty-five years, we have perfected our skills and expanded our assortment. According to your needs, we can make not only beds and mattresses, but also decorative pillows, bean bag chairs, pouffes with storage space, and other small soft furniture and easy chairs for the children's room.

Geometric collection

The main thing that all beds have in common is geometry. Line, square, circle, point: these are the fundamental geometric forms. They are chosen as the starting points for creating Gergama beds. Proportion, rhythm and ergonomic design find a harmonious balance in our six models.

As soon as you see them, you instantly understand that geometric forms are emphasised in the headboard. Here is where the lines, squares, circles and points reveal themselves. The height and thickness of the headboard can also vary. This affects the measurements of the bed itself: because the measurements dictate the importance of the bed in the interior space, the collection is made up of a variety of beds suitable for a range of spaces large and small.

SQUARE

SQUARE

An interpretation of the classic headboard divided into squares. Its exceptional character comes from the rhythm among squares of different sizes, and using lines the relief emphasises the softness of the fabric. As the day passes, the light sliding across the relief highlights its materiality and attractive form.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

The pulsation among different forms suggests a sense of harmonious playfulness.

LINES

LINES

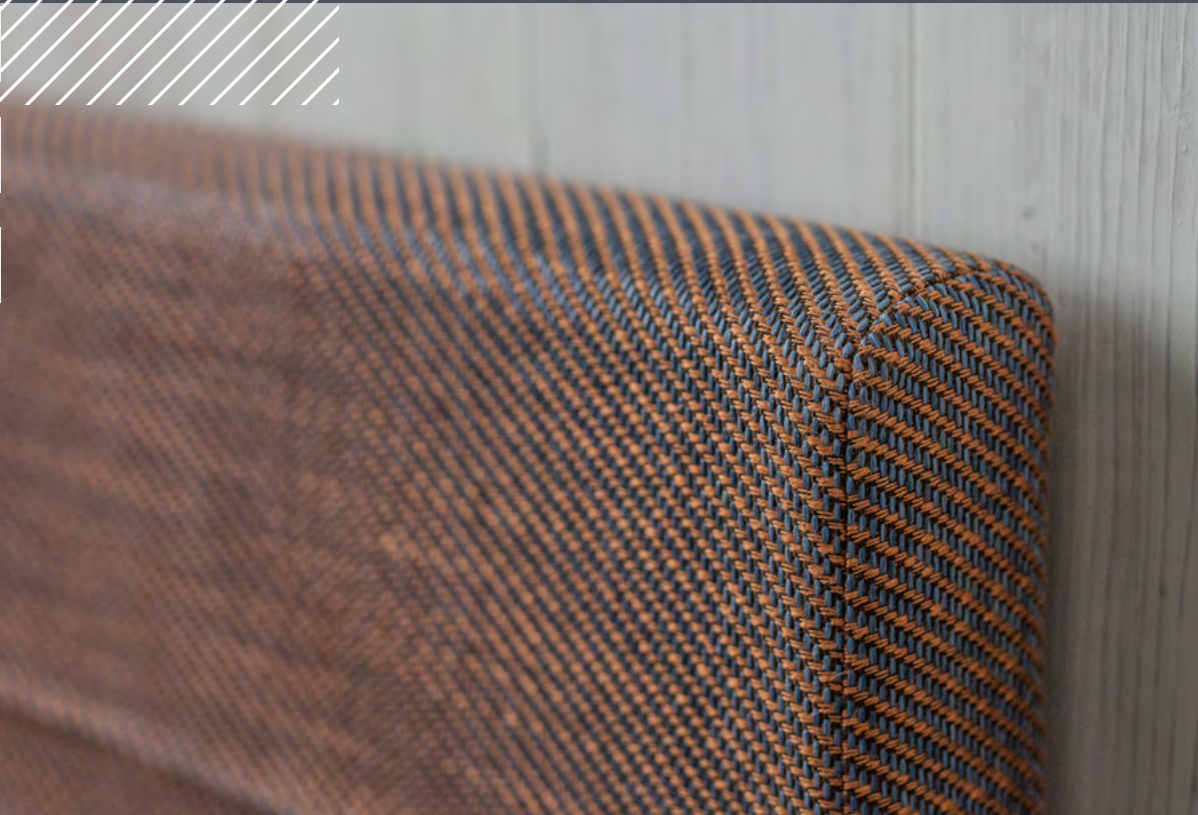

Solid rhythm. The bed is distinctive for its characteristic inlaid lines in the upper part of the headboard. This forms a subtle relief which is highlighted by the contrast of light and shadow. In this way, the textile is naturally supplemented with ever-changing nuances of light.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

The tranquil headboard gives the bed a feeling of stability and can be integrated into interior spaces of various styles.

LIGNE

LIGNE

A simple solution, an unlimited number of variations. The composition of this bed is changeable; thanks to the modular structure of the headboard, the bed can be flexibly adapted to different interior spaces by changing the colours and arrangement of the modules.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

Separate modules that can be arranged horizontally or vertically allow you to create different solutions for your particular interior space, from minimalist to architecturally integrated.

Components

page 46

ROND

ROND

An accent of round forms in the interior. The accent is created by the thickened headboard, which ends in a semi-cylindrical shape. This bed has the lowest headboard compared to the other models in the collection; it is especially comfortable to lean back on in a semi-reclined position.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

The bed’s sleek and streamlined form is especially accented, giving the interior space a sense of cosiness.

DOTS

DOTS

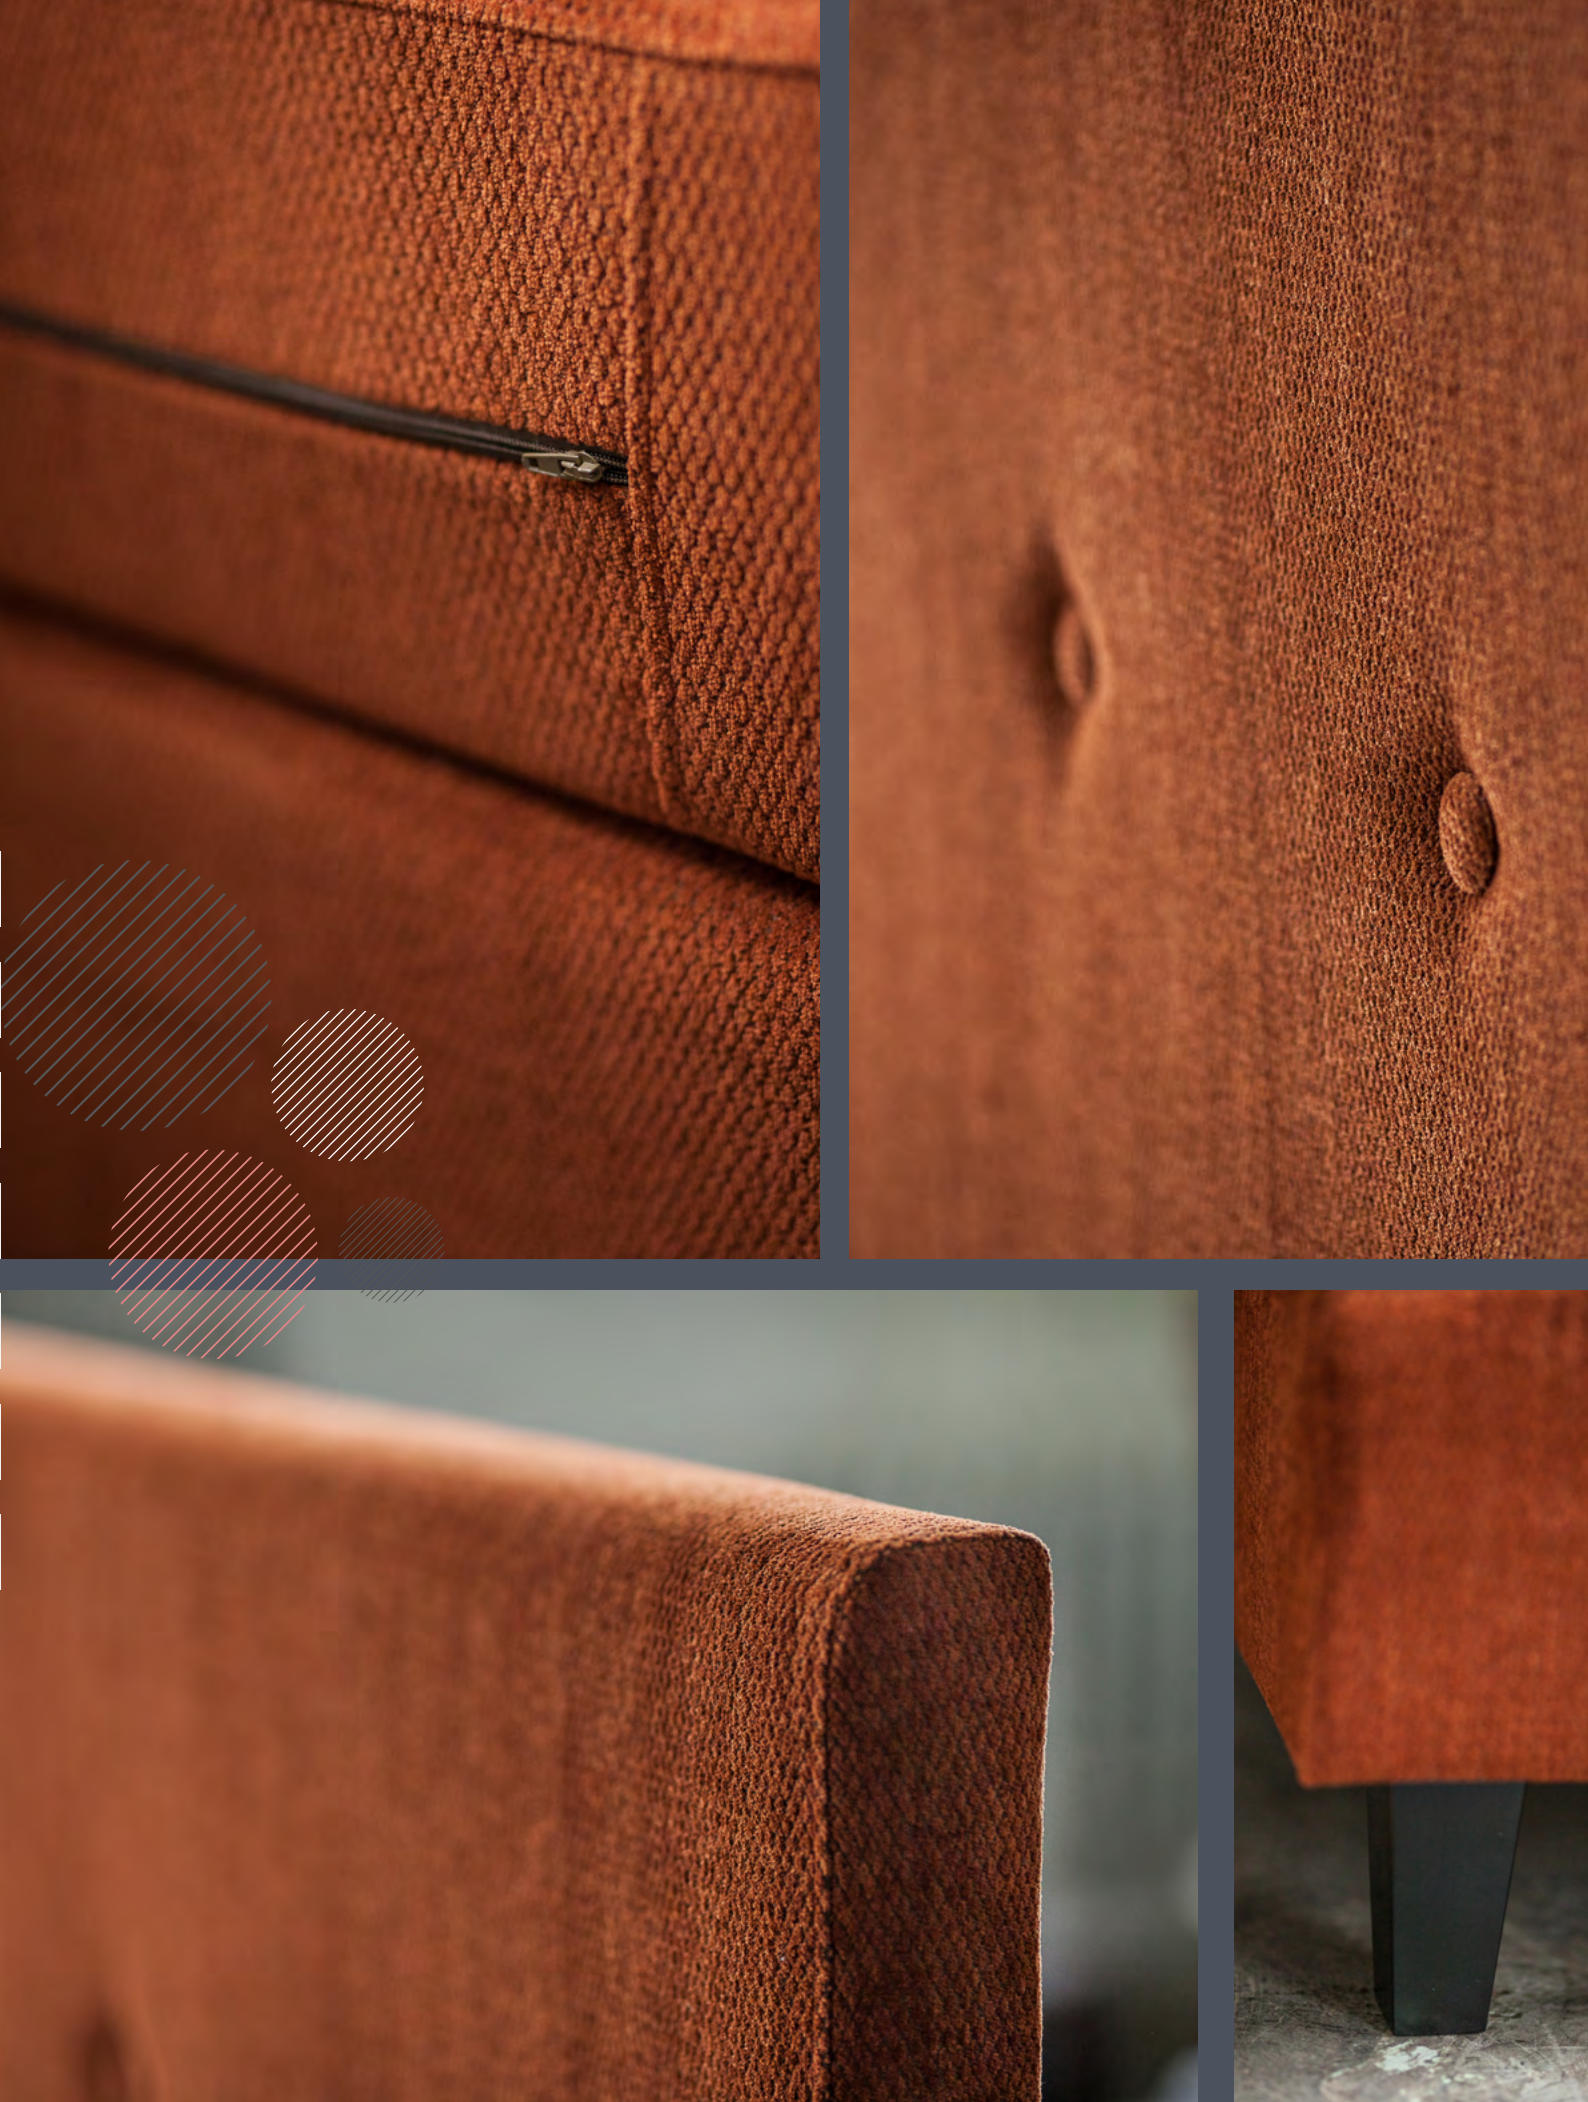

Front and centre, a composition of four points in the plane of the headboard. The composition is formed by upholstered buttons, the colour of which can be chosen independently of the bed's fabric. The inset buttons not only provide an accent, but also highlight the softness of the bed.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

A point in a plane is the starting point for various possibilities. Here the button symbolises the point, which invites you to design and coordinate various accents.

ESPACE

ESPACE

Radical minimalism. This model is the most appropriate for an exceptional textile: the form of the bed brings out the features of the ornamentation and texture. Another of the bed’s advantages is its size; thanks to its masterful construction and especially thin headboard, ESPACE has become one of the most compact beds available.

DIMENSIONS

200 x 90
200 x 120
200 x 140
200 x 150
200 x 160
200 x 180
Other

The minimalism of the bed frees up space for the decorator’s ideas.

MATTRESSES

HORIZON

- Adapts to the body. Breathable. Elastic.
- The mattress support core is made of a supportive “MultiPocket” block, in which the springs are individually encased in pockets, so they individually respond to pressure from the body.
 - The springs are divided into 7 anatomical zones, so they perfectly adapt to the contour of the body, prevent movement from rolling across the zones and provide proper support to the spine.
 - The springs are surrounded by polyurethane foam (35kg/m3), which is durable, breathable and provides a comfortable feeling.
 - The mattress support core is wrapped in an insulator layer made of special material to protect the home interior from polyurethane dust, which eases the process of putting on and removing the exterior upholstery.
 - The quilted knitted slipcover is removable and washable in water up to 40 degrees.

PERSPECTIVE

- Adapts to the body. Breathable. Elastic.
- The mattress support core is made of a supportive “MultiPocket” block, in which the springs (coils) are individually encased in pockets, so they individually respond to pressure from the body.
 - The springs are divided into 7 anatomical zones, so they perfectly adapt to the contour of the body, prevent movement from rolling across the zones and provide proper support to the spine.
 - Durable, breathable and HR (High Resilience) polyurethane foam (35kg/m3) surrounds the springs on both sides of the mattress. The foam is profiled in waves, so it massages the body while you sleep.
 - The block of springs is surrounded on the sides by durable polyurethane foam (25kg/m3), which ensures that the springs comfortably adapt to the contour of the body, even when getting out of bed.
 - The mattress support core is wrapped in an insulator layer made of special material to protect the home interior from polyurethane dust, which eases the process of putting on and removing the exterior upholstery.
 - The quilted knitted slipcover is removable and washable in water up to 40 degrees.

HIGHLIGHT

Perfectly adapting to the contour of the body.

- The lower part of the mattress is made of polyurethane foam (35kg/m3), which is breathable, durable and provides firm support to the spine.
- The top layer of the mattress is especially comfortable viscoelastic polyurethane foam (57kg/m3). The foam perfectly adapts to the body, relaxes the muscles and is breathable. The special cubed surface profile ensures that the mattress adapts even more precisely to the contour of the body.
- The 7 anatomical zones in the mattress help to better adapt to the contour of the body. The viscoelastic foam yields in places where parts of the body exert greater pressure, while providing proper support to the spine.
- The mattress support core is wrapped in an insulator layer made of special material to protect the home interior from polyurethane dust, which eases the process of putting on and removing the exterior upholstery.
- The quilted knitted slipcover is removable and washable in water up to 40 degrees.

VOLUME

Perfectly adapting to the contour of the body.

- The lower part of the mattress is made of durable, breathable and HR (High Resilience) polyurethane foam (40kg/m3), the special zoning of which provides a comfortable feeling.
- The middle layer of the mattress is made of durable, breathable and elastic polyurethane foam of a specialised density (34kg/m3) (used only in this mattress). The foam is exceptionally soft and provides a unique sense of comfort while you sleep.
- The top layer of the mattress is especially comfortable viscoelastic polyurethane foam (57kg/m3). The foam perfectly adapts to the body, relaxes the muscles and is breathable. The special cubed surface profile ensures that the mattress adapts even more precisely to the contour of the body.
- The 7 anatomical zones in the mattress help to better adapt to the contour of the body. The viscoelastic foam yields in places where parts of the body exert greater pressure, while providing proper support to the spine.

POINT

Especially comfortable. Adapts to the body. Breathable.

- For softening the mattress, for evening out uneven areas of the mattress and for reducing the feeling of a gap on a sofa-bed.
- The base of the mattress topper is made of durable, breathable and elastic polyurethane foam of a specialised density (34kg/m3) (used only in this mattress topper). The foam is exceptionally soft and provides a unique sense of comfort while you sleep.
- The quilted knitted slipcover is removable and washable in water up to 40 degrees.

CURVE

Especially comfortable. Adapts to the body. Breathable.

- For firming up the mattress, for evening out uneven areas of the mattress and for reducing the feeling of a gap on a sofa-bed.
- The base of the mattress topper is made of Vita Talalay EMBRACE®, a technologically advanced latex which adapts to the contour of the body, in response to your temperature.
- The latex adapts to the contour of the body just like viscoelastic foam does: it yields in places where parts of the body exert greater pressure, while providing proper support to the spine.
- The quilted knitted slipcover is removable and washable in water up to 40 degrees.

COMPONENTS

COMPONENTS

FABRICS

Fabric can move the bed to the forefront of the room. It is equally possible for the fabric to neutralise the bed, leaving only its forms to speak. Understanding the different needs of interior design, we provide a broad palette of fabrics. This creates the opportunity to assemble a unique bed according to individual needs, and the quality of the materials ensures long years of use.

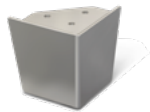

LEGS

This is a small yet important part. For those seeking exceptional harmonisation, we provide several different solutions.

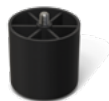

Oak support leg
Height - 12 cm

Metallic shiny support leg
Height - 10 cm

High metal support leg
Height - 17 cm

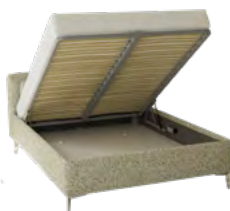

Basic bed leg
Height - 5 cm

SLATTED BED BASE & BED FRAMES

A dense slatted bed base brings out the best properties of the mattress. The bed base conceals the spacious bedclothes box, which is easily reached by lifting the mattress together with the slatted bed base.

To ensure long years of use for the bed, we make bed frames out of birch plywood. It not only ensures durability, but also allows the mattress to breathe.

LIGHTING

This is a small yet important part. For those seeking exceptional harmonisation, we provide several different solutions.

FLEXI lighting
Height - 50,2 cm

Floor lighting

BEDROOM FURNITURE

Extend the possibilities. The fabric of this bedroom furniture and accessories can be matched to the bed.

KANTATA nightstand
Width - 50 cm,
depth - 50 cm,
height - 50 cm.

KVARTA storage bench
Width - 135 cm,
depth - 47 cm,
height - 47 cm.

SOLO storage box
Width - 45 cm,
depth - 45 cm,
height - 44 cm.

NATA nightstand
Width - 46 cm,
depth - 49 cm,
height - 47 cm.
